

Green Water Treatment Technology Enabling Zero Discharge

NORWAFLOC™
Bio-flocculant

Natural biodegradable flocculant/coagulant. More efficient and cost effective than competitive products.

NORWASORB™
Absorbent media

High efficiency and reusable. Multipurpose applications.

NORWACO™
Coalescing media

Maintenance friendly, efficient coalescing media for retrofit or supplied in new innovative vessels.

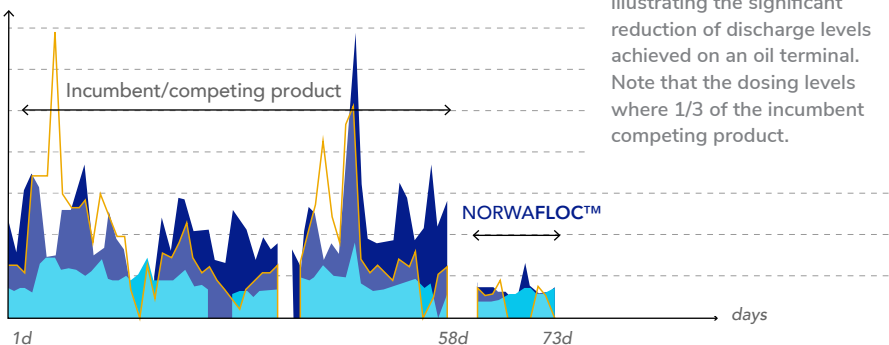

NORWAPOL™
Polishing reactors

Tertiary, automatic back-flush polishing vessels for ZERO DISCHARGE.

All our products are offered as standalone products or combined into integrated tailor-made solutions.

NORWAFLOC™ is our product series of totally green, environmentally friendly, and highly efficient water clarifiers, originally developed for the oil and gas industry. It captures oil droplets, particles, split emulsions, and creates large easily separable conglomerates that enable reduction of hydrocarbons, toxic chemicals and other pollution to the marine environment.

mg/lit ■ Oil in Water ■ Phenols ■ Phosphorus

OUR INNOVATIONS

M Vest Water is an innovative water treatment, product, equipment and process technology provider. Based on proprietary and own developed IP for water treatment our products are designed to reduce both final discharge levels and reduce CAPEX and OPEX cost for the client.

M Vest Water provides its green innovative products through cooperation with major chemical and service providers or we provide directly to end client.

APPLICATIONS

M Vest Water has developed product solutions for Produced Water Treatment, Flow Back Water Treatment, EOR Reuse of Water Treatment, Slop Water Treatment, Reuse solutions of Water for Oil Desalting, Reuse and Zero Discharge solutions for Refinery Water. Our products are also suitable for other industrial and municipal water treatment applications.
